

MIHAIL LEPADATU

ICT & Software Engineering Student at Fontys University, Eindhoven

Motivated full-time student and part-time worker currently based in Eindhoven. My background started with C++ back in high school. That was my starting point in my software engineering journey. It helped me realize that IT is all about logic, and hard work obviously ☺. After moving to Netherlands, I started practicing with creating Windows Forms Applications in C#, databased with SQL, and web applications using Angular, Vue, React, Bootstrap, and just plain HTML, CSS, PHP, JavaScript. Currently looking for a graduation internship.
